PROFESSIONAL SUMMARY

Aspiring **Software Development Engineer (SDE)** with strong foundations in **Data Structures**, **Object-Oriented Programming**, and **backend development**. Experienced in building **scalable applications** and **RESTful APIs** using Java and Spring Boot. Demonstrates strong problem-solving skills with **200+ DSA problems** solved and hands-on experience in designing efficient, data-driven systems.

TECHNICAL SKILLS

Programming & Query Languages: Java(Spring Boot), Python (NumPy, Pandas), SQL, JavaScript, HTML, CSS

Database Management: MySQL, MongoDB, DBMS, Relational Schema Design

Core Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management System.

Software Development Concepts: SDLC, Agile Methodology, Performance Optimization, Debugging, REST APIs

Tools: Postman, Git & GitHub, VS Code, Eclipse, XAMPP, Figma, Canva, Office 365

TECHNICAL PROJECTS

CarCaddy - Car Rental Management System

Tech Stack: HTML, CSS, JS, Java, Spring Boot, MySQL, REST APIs, Postman, XAMPP

- Developed a **scalable backend system** handling 500+ records across **rental**, **employee**, and **vehicle management workflows**.
- Designed normalized **MySQL database schemas** with defined relationships to ensure data integrity and efficient query handling.
- Built **RESTful APIs** with optimized query handling, reducing query response time by ~25%, improving system responsiveness and enabling scalable module-level data operations.
- Implemented robust **input validation** and centralized **exception handling** to ensure data integrity and prevent runtime failures.
- Added features like **employee account creation** and **deactivation** with email notifications to improve system usability

SafarSetu - Multilingual Tourism Guide Bot

Tech Stack: Python, Telegram Bot API, JSON, REST APIs, GPS/Location APIs, Text-to-Speech (TTS), File-based Data Storage

- Developed a **Telegram bot-based** application serving structured heritage data for multiple locations with **multilingual content** and **audio support**.
- Designed **backend logic** to handle user requests, process inputs, and return relevant data dynamically.
- Designed efficient **JSON-based data** storage and retrieval mechanisms, reducing response latency for user queries.
- Integrated **REST APIs** for **multilingual content generation** and **text-to-speech audio** output with user-friendly interaction flow to ensure smooth navigation and better user experience
- Handled **multilingual data for 5+ location-based entries**, improving content accessibility and response efficiency.

Sorting Algorithm Visualizer

Tech Stack: HTML, CSS Animations, JavaScript, DOM Manipulation, Algorithm

- Built an interactive sorting algorithm visualizer to demonstrate the real-time behavior of common sorting techniques on dynamically **generated arrays**.
- Implemented **frame-based animations** using the p5.js Canvas API to clearly illustrate step-by-step algorithm execution and relative time complexity differences.
- Optimized **rendering performance** by transitioning from **DOM manipulation** to **Canvas API**, reducing memory usage and improving animation smoothness.

INTERNSHIP EXPERIENCE

Java Developer Intern - Infosys Springboard

- Developed **backend modules for CarCaddy** using Java, Spring Boot, and MySQL.
- Implemented **backend functionalities** using **Spring Boot**, including **REST API design**, **request handling**, and **database integration**.
- Performed **API testing**, **debugging**, and **validation** using **Postman** to ensure reliability and performance of endpoints.
- Collaborated in an **Agile development environment**, contributing as a **Full Stack Developer**, **Scrum Master**, and **Tester** across development cycles.
- Tested** and **validated 20+ API endpoints**, ensuring reliability and performance of backend services.

EDUCATION

B.Tech in Computer Science And Engineering (Nov 2022 – June 2026)

Aggregate Percentage- **89.6%**

ACHIEVEMENTS

- Solved **200+ Data Structures and Algorithms problems** on different coding platforms, focusing on time and space optimization.
- Maintained a well-documented GitHub repository showcasing full-stack and data-driven projects with structured code and workflows.
- Earned **Microsoft Azure AI-900 Certification**, building foundational knowledge in AI and Azure AI services.
- Recognized among the **Top 5% performers** in the **NPTEL Cloud Computing certification exam**.
- Published a **research paper** titled “SafarSetu” - An AI-Powered Chatbot: <https://doi.org/10.22214/ijraset.2025.76656>
